

Riverside Paintless Dent Repair Bumper Repair **3M Clear Bra Paint Protection Film**

Description:

Ultra Automotive Reconditioning
Paintless Dent Repair (PDR) Specialists

Keeping your vehicle looking like new is a big challenge, especially with your busy schedule. Here at Ultra Automotive Reconditioning we have designed a facility that can accommodate all of your auto reconditioning needs at one location. Most repairs can be done in one day. This can be extremely cost effective compared to conventional repairs or replacement parts for your car.

We pride ourselves on the highest quality workmanship possible. Our reconditioning processes utilize the latest state-of-the-art tools, equipment, and techniques. Let the staff at Ultra Automotive Reconditioning show you how we can preserve your vehicle's appearance and maintain its resale value.

Come visit us at our new Riverside location conveniently located near the 60 and 91/215 interchange. Schedule an appointment to have our professionals repair your auto's dings, dents, windshield cracks, paint scrapes and most other cosmetic issues. Come in with your auto for a free estimate!

To: INSURANCE PROVIDERS

Paintless dent repair has evolved into a mainstream business and continues to show its viability in the body shop industry because of the time savings, quality of repair, and cost effectiveness.

Ultra Automotive Reconditioning has a state of the art facility offering a vast array of services. Our professional specialty is "PDR" (Paintless Dent Removal). Most people are unaware of the larger dents we can repair with virtually flawless results using our unique processes. We repair small to large dents on a daily basis that range from \$75.00 to \$500.00 in cost, with no filler or paint. These repairs, done by a standard body shop, often cost from 2 to 3 times our price to perform.

Our goal is to provide the best professional level of service to your customers with the PDR process. This is a "Win / Win" situation because the

insured vehicle can often be repaired at a cost under the deductible and the insurance provider will save on a claim while helping expedite their customer's repair work.

Please refer all minimal damage repairs to Ultra Auto Recon and we can assess the repair to see if it is a candidate for our professional PDR process.

Please visit our website at www.ultraautorecon.com to view before and after photos of dents we have repaired. You can also E-Mail any photos of the damaged area to steve@ultradenttools.com.

Sincerely,

Steve Hopf, President
Ultra Auto Recon
Paintless
Dent

Removal We can remove small dents and dings from your vehicle without the use of body fillers and repainting. We also have the ability to remove some larger dents as long as the metal is not stretched or creased too deeply. Let us determine whether your car is a candidate for Paintless Dent Removal.

[Click Here for Examples of Our Work](#)

Invisible

Bra The paint protection film called the "Invisible Bra" is rapidly growing in popularity because of the ultimate protection from bugs, rock chips and sand damage. This bra is virtually undetectable. This film can be applied to any painted area prone to damage including headlights.

Minor Paint Touch-Up Rock chips, scratches, scuffs and paint transfer can all be repaired with Ultra Automotive Reconditioning's paint touch-up technology. Improve the appearance of your vehicle without repainting the entire panel.

Windshield Repair Rock chips, bull's eyes, star breaks can be injected with a resin that fills in and bonds the glass. This will prevent the break from getting worse and substantially improves the appearance. Most insurance policies cover these repairs at no cost to you.

Wheel

Repair Most of today's cars have painted alloy

wheels that are very expensive to replace. Curb scrapes, scratches, scuffs, and surface blemishes can often times be repaired with specialized abrasives and conventional paint methods. This can bring substantial savings to you.

Auto

Detailing Ultra Automotive Reconditioning offers polishing, waxing, swirl removal, over spray removal, carpet and upholstery cleaning. We also do leather conditioning and deodorizing.

Headlight Restoration Now you can return the new appearance and functional clarity of the headlights on your vehicle without having to replace them. We can recondition the surface of your headlights by removing sand blast damage, gravel pitting, and scratches!
